The Producer Database (PDB) compiles information provided by participating state insurance departments including licensing information on insurance producers and/or registered securities brokers and regulatory actions on insurance producers, companies and other entities engaged in the business of insurance. Not every state participates actively or fully in the PDB. The Producer Database does not report adverse licensing or regulatory action information on individuals if the information is more than seven (7) years old. Users are cautioned that the absence of information on a particular individual or entity should not be taken as conclusive that no licensing or regulatory action information exists. The information is provided "AS IS" and there is no guarantee of the truth or accuracy of the information provided by the state insurance department. There is no guarantee the information in the PDB has not been modified, revised or updated and not reported by the state insurance department to the PDB.
